SPRINKLERED RISKS ONLY

Surplus Line Department

We are able to immediately cover large amounts on desirable risks *irrespective of other amounts on the same properties* obtained through other channels.

For more than thirty years we have conducted this department of business with European and American offices and our facilities are unequalled.

There never is trouble, vexation, or delay in the adjustment of losses when forms have been drawn and risks have been placed through our office.

Automatic Control of Fire Hazards

Our sole aim is to afford customers the highest possible character of equipment designed to automatically and positively control fire.

"Automatic" Fire Extinguishing Equipments, including Standard Sprinkler Apparatus, Wet and Dry Pipe, also Protection against special hazards, such as powder manufacturing, pyroxyline products, varnish dip tanks, oil and grease fires; Automatic Draft Stops; Automatic Water Curtains; Automatic Drainage of Hazardous Liquids; Automatic Fuel Oil Stops; Automatic Chemical Equipments for Supplying Automatic Sprinklers and Hose Standpipes Independent of Water Supplies; Sprinkler Heads, Dry Valves; Alarms, water and electric; Automatic Fire Door Releases; Deluge Valves; Sprinkler Systems, and all auxiliaries to complete systems of protection on ordinary and unusual fire hazards.

We Do Nothing But Specialize in Fire Protection

INTRODUCTION TO

FIRE DEPARTMENTS AND

WATER SUPPLY

The statistics given herewith are the culmination of forty-five years' effort on the part of The Spectator Company to perfect them, and cover the field of Water-Works Systems and Fire Department equipment of the cities, towns and villages of the United States and Canada, being the only publication of its kind in existence. The information has been compiled with great care for the present edition and corrected to June 1. The plan is to include every place having a population of 2,000 or more. These reports have already proved invaluable to fire underwriters, manufacturers and others, and it is our purpose to extend and improve them from year to year. The populations as given in these reports are taken from the official census of 1920, except in a few cases where later information was obtained.

We desire to extend our thanks to all persons who have aided us in collecting these statistics, either by filling out the blanks sent to them or otherwise contributing to secure accuracy.

Underwriters' Ratings—The underwriters' ratings given in the following pages are generally in accordance with the specifications here outlined:

First Class.—Full paid fire department, electric fire alarm system and adequate water-works.

Second Class.—Volunteer or partly paid fire department; with engineers and drivers fully paid and always on duty, and adequate water-works.

Third Class.—Volunteer fire department and fair water supply.

Fourth Class.—Facilities inferior to those of third-class towns.

Fifth Class.—No fire protection.

List of Abbreviations Used in the Following Pages.

a.—acres.
aer.—aerial.
al.—alarm.
auto.—automobile.
bk.—brick.
bldgs.—buildings.
